

Nível: Doutorado

Obrigatória: Não

Carga Horária: 45

Créditos: 3

Ementa: Estudo dos impactos do clima urbano no conforto térmico e no consumo energético do edifício. Integração das informações climática e energética no planejamento e projeto do edifício e de áreas urbanas. Estudo das correlações entre arranjos construtivos urbanos e microclimas. Análise de materiais, superfícies, padrões de vento e de radiação solar no ambiente urbano e o rebatimento no desempenho térmico e consumo de energia na escala do edifício.
