

Nível: Doutorado

Obrigatória: Não

Carga Horária: 45

Créditos: 3

Ementa: Algoritmos de iluminação natural. Estudo comparativo dos métodos do Raio Traçado e da Radiosidade. Uso do Método Monte Carlo na abordagem estocástica da simulação da luz natural. Modelagens de padrões de luminância de céu. Coeficientes de luz natural. Iluminância Útil de Luz Natural. Aplicações.
